

**Amendment to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1-15. Cancelled (without disclaimer or prejudice.)

16. (New) A method of handling reminders in a handportable communication terminal wherein a reminder is an electronic message which includes a reminder time and date and a reminder text which reminds a user of the terminal that an action should be taken as indicated in the text and which causes the terminal to generate an alarm alerting a user of the terminal that the action should be taken when the time and date is reached; comprising:

manually entering characters into a text editor for providing that reminder text; entering time information into a time entry for setting the reminder time; providing real time clock information from a clock application; comparing the time information with the real time clock information; alerting a user of the terminal with an alarm when the real time clock has reached the reminder time and date; and transmitting the reminder to a remote second communication terminal via a wireless communication network based on the alerting with an alarm.

17. (New) A method according to claim 16, wherein the alerting with the alarm comprises display of the reminder text.

18. (New) A handportable communication terminal, including  
a control unit,  
a user interface including a display and text input means with said user interface  
being controlled by the control unit for generating reminders wherein a reminder is an  
electronic message which includes a reminder time and date and a reminder text  
which reminds a user of the terminal that an action should be taken as indicated in  
the text and which causes the terminal to generate an alarm alerting a user of the  
terminal that the action should be taken when the time and date is reached,  
comprising:

a clock application controlled by the control unit and having a clock function and  
a reminder application which the display can present, the reminder application including  
a text editor in which the user through the user interface enters the reminder text, and a  
time entry in which the user through the user interface enters the date and the time for  
the reminder at which time and date the reminder text is displayed by the display and  
an alert unit that generates an alarm which alerts the user when the clock reaches the  
entered date and time for the reminder; and wherein

the reminder application allows the user to transmit the reminder to a remote  
second communication terminal via a wireless communication network based on the  
alarm.

19. (New) A handportable communication terminal according to claim 18,  
wherein the clock application provides real time clock information to the reminder

application and the reminder application displays a reminder note when the real time clock has reached the reminder time.

20. (New) A handportable communication terminal according to claim 18, wherein the reminder application provides the user access to add new reminders, view all existing reminders and erase existing reminders.

21. (New) A handportable communication terminal according to claim 18, wherein the reminder application upon receiving instructions to send a reminder requests the user to enter a phone number of the second communication terminal which is to receive the reminder.

22. (New) A handportable communication terminal according to claim 21, wherein the reminder application allows the user to search for the phone number of the second communication terminal in an internal phone number database of the terminal.

23. (New) A handportable communication terminal according to claim 21, wherein the reminder application allows the user to inspect a reminder received from the remote second communication terminal via a wireless communication network.

24. (New) A handportable communication terminal according to claim 21, wherein the reminder application furthermore allows the user to save or discard a reminder received from the remote second communication terminal.

25. (New) A handportable communication terminal according to claim 21, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.

26. (New) A handportable communication terminal according to claim 22, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.

27. (New) A handportable communication terminal according to claim 23, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.

28. (New) A handportable communication terminal according to claim 24, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.

29. (New) A handportable communication terminal according to claim 25, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.
